

Lifted Strength Club - Website Project Brief

Prepared from a full review of drsharongam.com and the *Girls Gone Strong* reference page. This is the working doc behind the 3 design mockups.

1. What the new site is

A new website for **Lifted Strength Club** - Dr. Sharon Gam's new strength studio at **2100 N Ronald Reagan Blvd #1012, Longwood, FL 32750** (Seminole County). It replaces the current Dr. Sharon Gam site, carrying over almost all of the existing content **except the courses** (which are being retired).

- **Tagline:** Strong Mind. Strong Body. Strong Life.
- **Positioning:** Strength training *for mental health*. Science-based, beginner-friendly, explicitly anti-shame ("No weigh-ins. No before-and-after pics. No pressure to transform.")
- **Founder/coach:** Dr. Sharon Gam - PhD (Health & Human Performance), CSCS, ACE Health Coach.

2. Pages (the agreed structure)

Page	Purpose	Source content
Home	Hook + overview + funnel to consult	New (built from existing pieces)
About	Sharon's story, credentials, philosophy	From existing About page
Training	How the studio works, session structure, philosophy	From existing Training page
Membership / Pricing	In-studio + online pricing tiers	From existing pricing (below)
Blog	20 existing articles, 4 categories	Migrated from /articles
Book a Consult	Scheduling (embedded)	New

Real pricing carried over: - **In-studio personal training** (55-min 1-on-1): Bronze (3 mo) from \$970/mo | Silver (6 mo) from \$880/mo | Gold (12 mo) from \$790/mo (2x/week; 3x/week tiers also exist). All include movement assessment, nutrition report, coaching app, habit-setting session. - **Online coaching** (EverFit app, self-paced): 3 mo \$220 | 6 mo \$200 | 12 mo \$180.

20 blog posts across **Mindset | Training | Mental Health | Lifestyle** - all worth migrating (they're strong SEO assets; see §5).

3. Required functionality (from the brief)

Need	Recommended approach
Post blog articles	Native CMS blog (built into whichever platform)
Host eBooks	Gated download as newsletter lead-magnet (file hosting + email capture)
Newsletter signup	Email platform embed (e.g., Mailchimp / Flodesk / ConvertKit / Kit)
Consult scheduling	Embedded scheduler - Acuity (owned by Squarespace) or Calendly
eCommerce (later)	Not needed now (courses retired); platform should support it for the future

Each mockup already has these placed: scheduler + newsletter live in the same band near the bottom and in the nav CTA.

4. Platform recommendation

She currently uses **Squarespace** (hosted) with **HostGator** as the domain/legacy host, and says she's *not married to either*.

Recommendation: stay on Squarespace for the new build - unless you want to self-build. - **Why:** Blog CMS, newsletter, eBook hosting, and **Acuity scheduling** are all native/first-party. She already knows it. Easiest for her to maintain solo after handoff. Migration of her existing Squarespace content is the smoothest path. - **Alternative (more control, more work): WordPress** on her HostGator hosting - strongest for SEO/blogging long-term, but more maintenance. - **These HTML mockups are platform-agnostic** - they're for choosing a *look*. Once she picks a direction, we rebuild it on the chosen platform (or hand the HTML to a developer).

Decision needed: Squarespace (recommended) vs. WordPress vs. fully custom build.

5. SEO + carrying over the old site's history (the "gateway")

This is the important part for not losing her existing Google ranking. Plan:

1. **Keep the same domain if possible.** The cleanest SEO move is to launch Lifted at her existing domain or a subfolder - domain age/authority transfers automatically. If she wants a new domain (e.g., liftedstrengthclub.com), we preserve authority with redirects (below).
2. **301 redirect map.** Every old URL -> its new equivalent, one-to-one. Especially all 20 [/articles/...](#) blog URLs -> new [/blog/...](#) URLs. 301s pass ~all link equity and tell Google "this moved here permanently." **This is the gateway** - done right, rankings follow to the new site.
3. **Keep the article slugs/titles** wherever we can - they already rank.

4. **Local SEO (new gym = top priority):** - New **Google Business Profile** for the new city/address (name, category "Personal Trainer / Gym", hours, photos). - City + service keywords throughout ("strength training {{CITY}}", "personal trainer for mental health Central Florida"). - **LocalBusiness/HealthClub schema** - already embedded in all 3 mockups (fill in real address). - Consistent **NAP** (Name, Address, Phone) across site + directories.
5. **Technical hygiene:** XML sitemap, submit to Google Search Console, fast mobile pages, descriptive meta titles/descriptions (already in each mockup `<head>`), alt text on real photos.
6. **Before launch:** crawl the old site to capture every indexed URL so none are missed in the redirect map.

6. What we still need from Sharon

Resolved: gym name (Lifted Strength Club), location (Longwood address above), and we've pulled her real copy/photos/reviews into the mockups. Still open:

1. **Domain decision** - keep drsharongam.com, buy liftedstrengthclub.com, or both (redirect one to the other)? This is the single biggest SEO decision.
2. **Logo files** - do we have the real Lifted hexagon logo as a vector (SVG/AI/PNG)? The mockups use a rebuilt approximation of the palette logo.
3. **Final pricing** - confirm the carried-over Bronze/Silver/Gold + online numbers are current for the Longwood studio, and whether to show the full grid or "starting from" pricing.
4. **More reviews/photos (optional)** - we used her two real testimonials (Jess L., Ember V.) and existing photos; more recent ones would strengthen the new site.
5. **Email/newsletter tool** - which one (Mailchimp, Flodesk, Kit, etc.) so we wire the eBook + signup to it.
6. **Scheduler** - Acuity vs. Calendly, and her consult availability.
7. **Tagline** - confirm "Strong Mind. Strong Body. Strong Life." (the Lifted brand line) vs. her current "Stronger mind. Stronger body. Healthier you."
8. **Studio logistics** - is it staffed/open hours, or appointment-only? (Affects Google Business Profile setup.)

7. Suggested next steps

1. Sharon reviews the 3 directions -> picks one (or a blend) + gives notes.
2. We collect the items in §6 (especially **city, photos, domain decision**).
3. We build the chosen direction into a full multi-page site on the chosen platform.
4. We set up the **301 redirect map** + Google Business Profile + Search Console (the SEO gateway).
5. Launch, then monitor rankings and consult bookings.
